

CLIMATE CHANGE AND SUSTAINABLE FINANCE

SUPPORT CLIENTS AS THEY NAVIGATE CLIMATE CHANGE

DURATION

6 hours

DELIVERY CHANNEL

eLearning

Course Modules:

- 1 Climate Change Fundamentals
- 2 Climate Change Mitigation
- 3 Climate Change Adaptation

COURSE OVERVIEW & BENEFITS

As floods, droughts, and other extreme weather events threaten business operations and supply chains, financial institutions must be prepared to support their clients as they adapt to a warming world.

Climate Change and Sustainable Finance teaches financial services professionals how to navigate climate risks and regulations and identify climate change-related financing opportunities.

The course begins with an overview of climate risk science and risk drivers, and examines the frameworks and regulations guiding companies' adoption of green initiatives.

As it explores the business case for green investments, it explains how businesses can mitigate the financial impact of climate change and adapt to climate change-related disruptions. Participants then learn how to identify climate risks and opportunities in specific sectors, including the energy, building, transportation, agriculture, water, and waste management sectors, so that they can support clients' mitigation and adaptation activities via sustainable finance and investment. They also explore real-world examples of financial institutions that are incorporating green finance practices into their policies, processes, and initiatives.

LEARNING OBJECTIVE

Learn how climate change awareness is reshaping finance and how to support clients as they make their businesses sustainable.

COMPETENCIES GAINED

Participants will be able to:

- Identify the factors that lead to climate risk vulnerabilities within an organisation.
- Identify key climate risk frameworks, principles, and regulations.
- Assess climate risks and opportunities in the energy, building, transportation, agriculture, waste management, water, and health sectors.
- Support clients as they adjust their business strategies to mitigate and adapt to climate vulnerabilities.
- Engage clients more effectively on the climate risks their businesses face and identify opportunities to provide sustainable finance.

TARGET AUDIENCE

Climate Change and Sustainable Finance is suitable for anyone who is involved in the loan origination process and seeking to build their understanding of climate change and its impact on clients, including relationship managers, credit analysts, ESG analysts, risk managers, and senior managers.
